

# Theodosius I

Augustus 379 – 395

The son of a famous general, Theodosius's own military prowess caught the eye of Gratian who sent him off with an army to deal with the various barbarian hordes making regular excursions into Roman territory. After scoring some impressive victories on the battlefield Gratian gave Theodosius the ultimate reward by crowning him emperor and formal successor to Valens.

Theodosius then went on to settle a peace treaty with the barbarians and conferred upon them "federate" status. This allowed them to occupy Roman territory under the condition that they would defend it against other intruders. The benefit, in principle at least, was that this settlement created a buffer zone for the Romans. In the following years he put down the rebellions headed by Magnus Maximus and then, literally with a little help from the weather, by the puppet emperor Eugenius.

*When a favored governor is murdered by an unruly mob Theodosius orders the army to stuff citizens of the city in the circus, its largest building, and have them all killed in revenge. Sickened by the senseless massacre of some 7,000 people St. Ambrose, Bishop of Milan, refuses to let the emperor enter his church and publicly humiliates him for the atrocity. Taken aback, Theodosius accepts responsibility and goes on a month-long period of penance during which time he seeks to appease the church by enacting a number of steps meant to sweep all traces of paganism from Roman lands. Now empowered with state and church sanction Christian mobs take to the streets all across the empire to lynch influential pagans and destroy their temples; aware that the principal perpetrators will likely be rewarded with sainthood. The orgy of violence culminates with the Patriarch of Alexandria, Theophilus, who incited his own posse to strip one of the ancient world's most magnificent temples, the Serapeum, of its treasures, burn thousands of documents housed within and finally raze it to the ground. To left, Theophilus is represented on a contemporary papyrus as a hero symbolically standing atop the doomed temple.*

During the waning years of his life he became the first Roman emperor to turn full circle on the issue of religious persecution. After centuries of Christian persecution and then another three quarters of a century whereby Christians and pagans coexisted more or less peacefully, Theodosius began the active persecution and steady elimination of all non-Christian sects and their temples. This policy would be vigorously followed by succeeding emperors. He died in 395 leaving behind a split empire to be ruled by his sons Honorius and Arcadius.

Coins by Theodosius are easy to come by with several denominations to pick from. The bronzes will be cheapest with the smallest, the AE4's, being so common that they're often not worth the time for several dealers to even sell - much less attribute - even when in flawless condition. These can be found every day on eBay.

Silver Siliquae are rarer than those of Valentinian I and Valens before him. Rarer still are the larger Miliarensis class.

For gold the three principal denominations are the Solidus, the Semissis and the new Tremissis or third of a Solidus. Only the Solidus is fairly common and typically costs around \$1,000 more or less.

**Notes:** Theodosius introduces the Tremissis, a third of a Solidus. A similar coin had been kicking around ever since the days of Constantine, the so-called 1-½ Scripulum at 1.5g, but it did not fit in well with the other denominations. The Tremissis will gain in popularity and eventually become the principal coin of 5<sup>th</sup> century Byzantine empresses who may have turned sizeable portions of their private wealth into these coins which then funded their charity projects. The AE4 makes its first large-scale reappearance since the memorial issues struck posthumously for Constantine. This time they will enter service not as memento mori trinkets but as the new pillar of everyday commerce. Within a decade it will have practically wiped out all other copper denominations and be the only one minted for the next hundred years.
